

# Spring 2023 Oracle State Park Wildflower Survey

Plant	Picture
Wild Heliotrope (Purple)	 A close-up photograph of a Wild Heliotrope plant. The plant features several small, vibrant purple flowers with five petals each, arranged in a terminal cluster. The leaves are green and narrow, and the background is a blurred natural setting.
Fleabane (White or Purple)	 A photograph of a Fleabane plant in bloom. The plant is covered with numerous small, white daisy-like flowers, each with a bright yellow center. The flowers are scattered across a dense, green, and somewhat tangled foliage.
Groundsel (Yellow)	 A photograph of a Groundsel plant. It shows a cluster of bright yellow, daisy-like flowers with many thin petals. The plant is growing in a dry, rocky, and shaded area with some green leaves visible at the base.
