

The Discovery of the Last Ground Sloth

By Doron Boaz Metz

Today, George the scientist and I are going to change one of the lightbulbs in the caves. After that, we saw and heard Kubla Khan the column crack. Then we saw last Giant Ground Sloth, named Speedy. The sound of the crack was so loud that it scared Speedy, he evolved to be fast just not very fast.

George, Speedy and I were trying to escape before the column broke. Then Speedy slowed down so we could ride on his back! Next we rode the Speedy to the other two rooms and finally to the gift shop where they let me choose one thing for finding Speedy.

I did not know what to choose and it turned out that the Speedy the Sloth had a really rare jewel that he gave to me. I traded it for everything in the gift shop that was available. I shared everything that I got with because it is the right thing to do. Speedy became my pet and friend. We love to visit Kartchner Caverns together!
