

Slip Sinker RIG

The Slip Sinker is one of the easiest, most popular rigs to catch catfish of all species. Line size and bait options may differ depending on your target species, but the concept remains the same. After casting, your rig will come to rest on the bottom of the lake or river you're fishing. When a catfish picks up the bait, it won't feel any resistance as the fishing line moves freely through the sliding sinker. This will give the catfish enough time to get the bait in its mouth allowing for a higher percentage hook set.

Main Line (to reel)

Sliding Sinker

18" Monofilament Leader

Barrel Swivel

Preferred Hook
